Statement from Michigan Agri-Business Association on P.A. 295 Implementation Report

LANSING— Jim Byrum, president of the Michigan Agri-Business Association (MABA), made the following statement this afternoon regarding the newly-released P.A. 295 Implementation Report

“Today’s MPSC report highlights the success of Michigan’s renewable energy standard, which has sparked investment and created jobs and opportunities, particularly in rural areas. With energy prices being one of our biggest costs of doing business, increasing our use of renewable energy will reduce costs and make our agribusinesses more competitive.”
